

TRANSVOLT BRAND BOOK 2026

Official Brand Identity & Design Guidelines

1. Brand Mission & Overview

Transvolt Mobility Private Limited is India's leading clean commercial electric mobility operator. We engineer, operate, and scale turnkey zero-emission fleet systems for enterprise corporations, public transit networks, and industrial campuses. This Brand Book establishes rigorous visual and communication standards to ensure brand consistency.

2. Core Brand Values

Sustainability: Uncompromising commitment to zero tailpipe emissions and renewable charging.
Engineering Precision: High-uptime fleet telematics, intelligent dispatch, and safety protocols.
Corporate Excellence: Premium corporate travel experience with professional chauffeurs and service.
Future Readiness: Continuous adoption of next-generation commercial EV battery and charger platforms.

3. Brand Voice & Tone

Our voice is authoritative, technologically sophisticated, environmentally accountable, and trustworthy. Avoid frivolous hyperbole. Let operational data, safety metrics, and emission reduction speak with clarity.

LOGO IDENTITY SYSTEM

Logomark Rules, Exclusion Zones & Visual Contrast

1. The Primary Logomark

The Transvolt mark embodies continuous kinetic motion, clean energy, and modern automotive elegance. It consists of the custom stylized lightning arrow brandmark paired with the bold corporate wordmark. Only use official vector (SVG) or master lossless PNG assets downloaded directly from the Branding Portal.

2. Exclusion Zone (Clear Space)

Maintain an isolation zone equal to 1.5x the height of the primary logomark symbol on all four sides. No competing graphic element, typography, button edge, or screen border may encroach into this area. This ensures maximum optical legibility across high-speed highway hoardings and small mobile viewports.

3. Background Contrast & Legibility

On white or light backgrounds (#FFFFFF, #F8FAFC), use the official Dark Navy/Black Transvolt logo. On deep backgrounds (#1F4E79, #0F172A, #000000), use the official Inverted Pure White Transvolt logo. Never place the logo on busy photographic textures without an approved translucent contrast shield.

4. Prohibited Usages

DO NOT stretch, condense, or distort the logo proportions under any circumstance.
DO NOT alter the logo gradient or apply drop shadows, outlines, glows, or 3D extrusions.
DO NOT rotate the logo off its horizontal baseline.

OFFICIAL COLOR PALETTE

Color Formulas for Print, Digital & Automotive Coatings

Primary Brand Colors

Electric Cobalt Blue (Primary Brand CTA):
HEX: #4472C4 | RGB: (68, 114, 196) | CMYK: (75, 48, 0, 0)
Represents dynamic electric power, modern technology, and user interactivity.

Deep Fleet Navy (Corporate Foundation):
HEX: #1F4E79 | RGB: (31, 78, 121) | CMYK: (90, 65, 20, 30)
Used for executive collateral, vehicle primary panels, and premium typography.

Secondary & Functional Colors

Charging Amber (Warning / Active Charging Status):
HEX: #ED7D31 | RGB: (237, 125, 49) | CMYK: (0, 60, 85, 0)

Clean Eco Emerald (Operational Ready / Eco Zero-Emission):
HEX: #70AD47 | RGB: (112, 173, 71) | CMYK: (60, 0, 85, 0)

Fleet Charcoal & Slate (Neutral Surface & Body Copy):
HEX: #262626 & #64748B | Provides effortless legibility across all documentation.

TYPOGRAPHY & HIERARCHY

Corporate Typefaces & Content Hierarchy

1. Primary Corporate Typeface: Inter

Inter is our standard corporate typeface family across web portals, mobile apps, and slide decks.

Fallback web-safe fonts: Segoe UI, Roboto, Helvetica Neue, Arial, sans-serif.

Its tall x-height and open apertures guarantee crystal clarity across screens and technical readouts.

2. Typographic Scale & Weights

Display / Hero Headings: Inter Bold (700) or ExtraBold (800) | 28pt - 36pt | Line-height 1.15

Page Titles & Section Banners: Inter Bold (700) | 20pt - 24pt | Line-height 1.25

Sub-headings & Card Labels: Inter SemiBold (600) | 13pt - 15pt | Line-height 1.35

Body Paragraphs & Tables: Inter Regular (400) | 10pt - 11pt | Line-height 1.50

Badges & Metadata: Inter Medium (500) | 8.5pt - 10pt | Uppercase with 0.05em tracking

3. Digital Portals & Mobile Interface

Maintain accessible contrast ratios exceeding WCAG AA standards (minimum 4.5:1 for standard text).

All interactive buttons and navigation links must provide clear focus and hover visual states.

FLEET LIVERY & COLLATERAL

Commercial Vehicle Graphics, Charging Hubs & Stationery

1. Electric Bus & Cab Fleet Livery

Vehicle wraps must use premium 3M automotive-grade cast vinyl with anti-UV gloss lamination. The Transvolt primary wordmark must be centered on the upper front quarter and emergency egress side. Livery colors must strictly match Transvolt Electric Cobalt (#4472C4) and Deep Navy (#1F4E79).

2. Charging Hub & Depot Signage

Hub entry totem must display corporate brandmark and 24/7 emergency contact hotline. Charger gun holsters and pedestals must feature standardized high-voltage warning pictograms. Bay markings must be painted with durable reflective thermoplastic polyurethane paint.

3. Corporate Stationery & Brand Custodianship

Letterheads, business cards, ID badges, and investor presentations must use standard portal templates. For inquiries or custom co-branding approval, contact the Brand Management Office: Transvolt Mobility Private Limited | Email: branding@transvolt.in | Web: www.transvolt.in
